The Future of Rice

Sustainability Transitions Summer School 2015

Indonesia, 27 July - 9 August 2015

More than half of the world's population depends on rice. But not all rice cultivation is ecologically sensitive, and rice trade is not always fair. This Summer School asks how to make the shift to sustainable and resilient rice cultivation in the global food system.

Join us and be part of a real-life educational opportunity on sustainability transitions. You will work in interdisciplinary teams with European and Asian participants, farmers, and stakeholders around Yogyakarta to explore opportunities of meeting the future demand for rice in a sustainable way.

We welcome applications from master students enrolled at the University of Natural Resources and Life Sciences, Vienna (including 'Mitbeleger'). Application forms are available on **BOKUonline**, Course No.169.004, 6 ECTS credits. Deadline: 31st March 2015.

For more information attend the **preparatory meeting** at BOKU, Centre for Development Research, **3rd of March 2015, 16:00 to 17:00.**
